

Secure-K

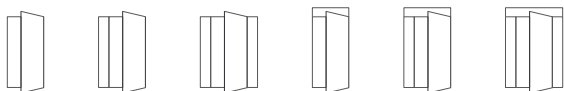

Premium entrance door

Secure K is the entrance door system that combines refined design with high-quality construction. Every detail is engineered to enhance the aesthetics of the façade and meet the expectations of even the most demanding architects and designers. Thanks to its extensive customisation options, the system allows for single- or double-leaf casement door configurations, with inward or outward opening, also available in flush design. It is designed to accommodate decorative or technical panels in a wide range of materials and finishes, making each door truly unique.

ADVANTAGES

- › Maximum thermal insulation, with U_d values as low as $0.6 \text{ W/m}^2\text{K}$
- › Outstanding acoustic performance, thanks to the special soundproof gasket combined with the insulating panel
- › Patented expansion joints ensure thermal movement at high temperatures without any issues
- › When configured with specific components and models, the entrance doors are burglar – resistant and certified up to RC3 security class
- › Every AluK Secure-K entrance door comes with exclusive AluK UNIX support
